

Patent No. 6,441,8549 to Fellegara et al., and further in view of European Patent No. EP 0 978 987 to Dow et al. Examiner has rejected claims 10-11 under 35 U.S.C. 103(a) as being unpatentable over the Eyemodule User Manual, in view of Visor Handheld User Guide, U.S. Patent No. 6,441,8549 to Fellegara et al., and further in view of the Eyecontact Manual.

Examiner has deemed allowable, or allowable if rewritten, claims 7, 8, 12, and 15-18.

Claim 7 is dependent upon independent claim 5. In accordance with Examiner's recitation of allowable subject matter, Applicant has rewritten all of the limitations of claim 7 into claim 5 and cancelled claim 7. Since claim 5 has been rewritten to incorporate the limitations of allowable claim 7, the other claims dependent upon claim 5 - claims 6 and 9 - are now believed allowable (as being dependent upon an allowable independent claim).

Claim 8, initially dependent upon claim 7, is now made dependent upon the rewritten claim 5.

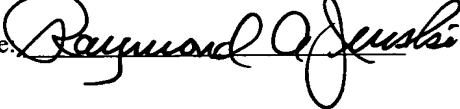

The remaining claims, claims 12, 15, 16, 17, and 18 do not require amendment in accordance with Examiner's notice of allowable subject matter.

Therefore, in view of the foregoing amendment and remarks, Applicant now believes all of the remaining claims of the present Application for patent to be suitable for allowance. Examiner is respectfully requested to withdraw the rejections of the claims of the present application and pass the amended application to allowance.
